News and Updates

Track & Field Day - Take 2: The rain couldn't stop us today, but it did slow us down. Although the weather report called for a 10% chance of rain until 12:30, our first race of the day was welcomed with a nice hard shower from above. We were able to get all of the running events done at the track before the storms started to roll in. We were also able to hold the high jump in the gym. We plan on completing the fielding events at Trinity on Tuesday around 1:00. You're welcome to join us in the fun!

Religion: In our first Christ Light lesson, Daniel continued to pray to God even when threatened with death. In our second lesson, God caused Esther to become the Queen of Persia so that she could save the Jews living there.

English: After a week of work, the students presented their research reports to the class on Tuesday. We all certainly learned a lot from each other about a wide variety of topics. This research report concludes our English class for the year!

Reading: *The Wind in the Willows:* Week 4 of Literature Circles brought us to the end of the book. The students were pleased that we were able to read a book about animals and not have one die in the

Reminders...

- PreK-8 sing on Graduation Sunday - June 5
- Please make sure your child is getting to school on time...4 more mornings left!!! You can do it!
- Stay strong to the end!

end. Next week we will be putting on a Readers' Theater Production from the book. It should be a hoot!

Math: The 5th graders had their last investigation of the year. It taught them about tessellations. The students even created their own tessellations which turned out to be pretty cool. The 6th graders also had their last investigation of the year. They learned about platonic solids and practiced constructing several of them with paper.

Social Studies: The Northeast region always seems to be the trickiest region and it didn't disappoint. The students still did a fantastic job with it but the sailing wasn't quite as smooth. Next week we combine all the regions with a 50 S&C quiz.

Science: This weeks' Health Handbook lessons taught us about the heart, activity pyramid, respiratory, digestive, excretory, and nervous systems. Next week we get to learn a little bit about the reproductive system. #prayingformaturity.

Picture Caption: Braving the weather and springing over the bar - Despite it being a weird day, the students still made the best of it and didn't even complain...too much.
